PROJECTS

Xchange E-commerce Website

- Created a website in which users can login to sell and buy products online.
- Created various API endpoints and middlewares such as user authentication, ad management, and favorites list, ensuring smooth frontend-backend communication. Proficiently tested APIs with Postman to ensure functionality, performance, and reliability, contributing to robust backend solutions
- Skills: JavaScript, ReactJS, MongoDB, Express, NodeJS, Next JS.

github.com/yuvasainath1/xchange

Todo website

- Designed a Todo website in which an Individual or a team or a family can login to add, update, delete todos.
- Skills: JavaScript, Bootstrap, ReactJS, MongoDB, Express, NodeJS.

github.com/yuvasainath1/todoapp

News-Hub

- Crafted an accessible News platform with categorized content, facilitating easy exploration of daily updates in technology, science, and social spheres, emphasizing seamless navigation and discovery.
- Skills: JavaScript, ReactJS.
